"Perhaps it would be of benefit if I were to summarize the situation that now exists," Stern suggested, "We com.He was satisfied that the Chironians would never provoke hostilities because they harbored no fears of Terrans and accepted them readily, as everything since the ship's arrival had amply demonstrated. They didn't consider the way Terrans chose to live to be any of their business, wouldn't allow their own way of life to be influenced, and weren't

bothered by the prospect of having to compete for resources because in their view resources were as good as infinite. But he felt less reassured about the Terrans- at least some of them. Kalens was still making inflammatory speeches and commanding a substantial following, and Judge Fulmire was under attack from some outraged quarters for having refused to reverse the decision not to prosecute in the case of the Wilson shooting. And more recently, Pernak had heard stories from the Chironians about Terrans who sounded like plainclothes military intelligence people circulating in Franklin and asking questions that seemed aimed at identifying Chironians with extreme views, grudges or resentments, and strong personalities-in other words the kind who typified the classical recruits for agitators or protest organizers. The effort had not been very successful since the Chironians had been more amused than interested, but the fact remained that somebody seemed to be exploring the potential for fomenting unrest among the Chironians. The probable reason didn't require much guesswork; Earth's political history was riddled with instances of authorities provoking disturbances deliberately in order to justify tough responses in the eyes of their own people. Although the finest restorative surgeon couldn't have rebuilt her beauty, the worst of the horror might. Quarrey sighed and shook her head. "You can have Franklin and the whole area around it as a thriving productive resource and an affluent market, or you can have it in ruins," she said. "Given the choice, which would you prefer? Well, it's not as if we didn't have the choice, is it? We have." "Really--you just walk in and help yourself. That's how they do things here... for everything." Driscoll met her eyes calmly. "I'd risk it," he said. "Sure, if this was for real, I'd put money on it." In most boys' books the world over, and in those for grownups, too, adventure always involves treasure..The night decanted the distillation of the August day, a long generous pour of heat without light..The image on the screen drifted to one side as the shuttle swung round to brake with its main engines, and then switched to a new view as one of the stem cameras was cut in. Colman was squeezed back against his seat for the next two minutes or so, after which the screen cut back to a noseward view, and a series of topsy-turvy sensations came and went as the flight-control computers brought the ship round once more for its final approach, using a combination of low-power main drive and side-thrusters to match its position to the motion of the Kuan-yin. After some minor corrections the shuttle was rotating with the Kuan-yin to give its occupants the feeling that they were lying on their backs, and nudging itself gently forward and upward to complete the maneuver. The operation went smoothly, and shortly afterward the captain's voice announced, "Docking confirmed. The boarding party is free to proceed." Clem waved an arm casually without looking back. "Go ahead," he said. "Can't see as you really need any, though. You're pretty safe up here. We don't get many burglars." Farnhill glanced helplessly at his aides, then braced himself and began leading the group after Clem while the Chironians parted to make way. The military deputation broke formation. to take up the rear with Wesserman tossing back a curt "Carry on, Guard-Commander" in the direction of Sirocco..woman. After uncapping the vodka, she hesitated before pouring. But. "What do you think?" Bernard asked Colman after a short silence. "Could it be done?" With the hum of the fan and the noise of the running water as cover, she did what she had never done in. "I never eat it," Leilani said. "The last time old Sinsemilla served it was Monday. So come on, tell me.. "Brandy and milk," Micky said, and at once Leilani, who was not drinking coffee, suggested, "Milk." "I have no idea," Colman said, grinning. Even Celia found that she had to bite her lip to prevent herself from laughing. "So what happened? Did you send them back up?" new-fallen night beyond a nearby window. "Maybe she's scared. Out in the dark, I mean." Sirocco shrugged. "Don't ask me. I thought it was because a lot of SD's are shipping down to Canaveral. I just do what the orders say." "Lay off, Hoover," Chang said wearily. "We'll check it out through the net. Okay, maybe we'll see you next week." "She couldn't have known," Geneva said, but those four words were more of a question than they were. "Who?" Driscoll asked automatically, tossing his cigarette butt into the incinerator and snatching up his gun. A cover in the top of Wellington's chest slid aside to reveal a small display screen on which the figures of Sirocco and Colman appeared, viewed from above. They were walking at a leisurely pace, along a corridor, talking to a handful of Chironians who were walking with them. Driscoll resumed his former posture, and moments later footsteps and voices sounded from along the wider corridor leading off to the right, and grew louder..rataplan of less-exhausting anxiety..sixteen, thereby squelching any affection he might have felt toward her..The Chironian hesitated for a moment as if reluctant to say something which he thought might be taken as insulting. What can you do?" he knows. He's confident I'll never leave the neighborhood with my camera or the film. Playing with me..Pernak tossed up his hands. "I've been to take a look at their university and what they do there. You

wouldn't believe it. And I've already got a position if I want it, for no other reason than that people already there say it's okay. You get a house, for nothing . . . a good one. Or they'd build you one however you want it. How can you say no? We're going to become Chironians. And so will everybody else when they've gotten over the voyage. Then people like Kalens can yell all they want, but what can they do if there's nobody left to take any notice? It's as I said-you have to start thinking like Chironians." "It certainly puts a new light on things," Lechat conceded. He sat back again, looked from one to the other, and spread his hands resignedly. "So am I to take it that I shouldn't assume your Support in the matter I talked about earlier?".Gump!".LOOKING MORE LIKE herself in the skirt and sweater that Jean had given her, Celia sat at the dining table in the Fallowses' living room, clasping a cup of strong, black coffee in both hands. She was pale and drawn, and had said little since her arrival with Colman forty minutes earlier at the rear entrance downstairs. The maglev into Franklin was not running and the Cordova Village terminal was closed down, but the tunnel system beneath the complex had provided an inconspicuous means of approach; Colman hadn't wanted to draw any undue attention by landing an Army personnel carrier on the lawn..Kath nodded. "Wally and Sam. It was only briefly, because I had to get back to Farnhill and your other people, but from what they said it seems as if you know quite a bit about MHD. Where did you study?".Lesley accepted automatically and found himself looking at the features of Colonel Oordsen, one of Stormbel's staff, looking grim faced and determined, but visibly shaken. "Activate the intruder defenses, close the inner and outer locks, and have the guard stand to, Major," he ordered. Her unexpected reaction caused the others to fall quiet and stare at her uncertainly. Then Jean said in a hesitant voice, "You don't seem very excited, Celia.
